

Review of the Parental Survey - October 2019

The feedback from parental surveys helps the Governors and Head Teacher to have a clear understanding of what parents think about our school and its ethos and teaching. We are able to review comment and consider where appropriate action can be taken or where changes can be made.

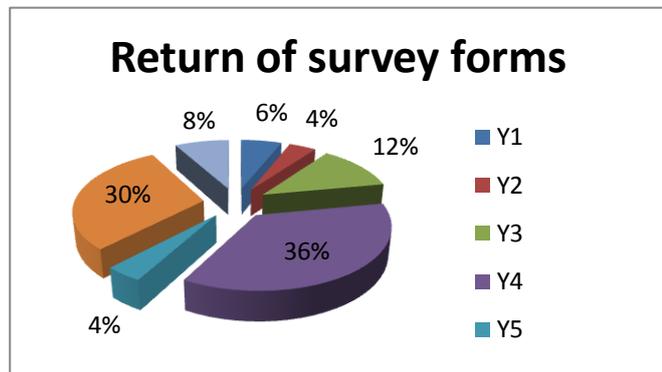

The following data is a representation from 50 surveys being completed and returned following parents' evening in October 2019.

The school supports 250 children in their primary education journey. The percentage of surveys returned can only reflect this percentage; we encourage all parents and carers to complete the survey in order to gather as much feedback as is possible. This feedback is important, as it allows us to consider actions to take going forward, but also celebrate key outcomes.

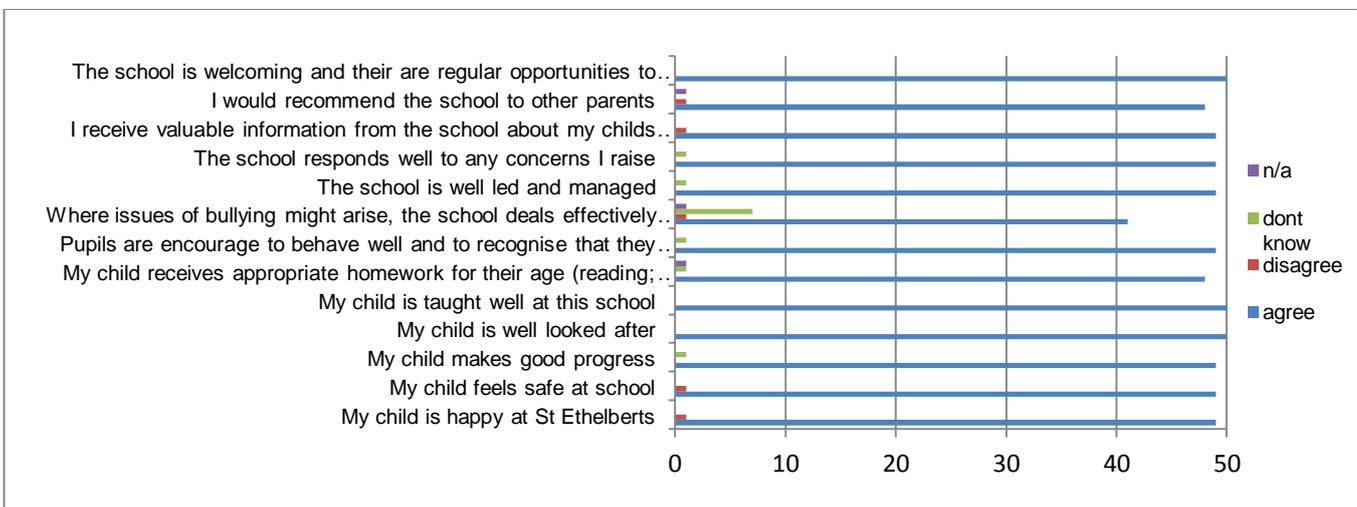

The spread of questionnaires returned from each class is broken down below:

Return of survey forms

| | No | % |
|---------------|----|--------|
| Y1 | 3 | 6.00% |
| Y2 | 2 | 4.00% |
| Y3 | 6 | 12.00% |
| Y4 | 18 | 36.00% |
| Y5 | 2 | 4.00% |
| Y6 | 15 | 30.00% |
| Not Specified | 4 | 8.00% |
| Total | 50 | |

The responses to the 13 questions put to our children's parents/carers are detailed below:

Overall this is a positive picture and one which should be celebrated.

We can see that further information on our anti-bullying policy would support parents and carers in understanding how this area is prevented and/or addressed by the school. This topic will be put forward for discussion at the next formal governors meeting.

There were 13 additional comments made: in the main, how parents and carers found the school to be an excellent place for their child and how their child was very happy here at St Ethelbert's. Two comments asked for improved communications which would assist working parents to receive information on their child's progress and what was going on at school. We are able to address this through the school's open door policy, individual letters of interest sent home with your child and school bulletins which are published on the school's website. Also; the school's Facebook page is populated with events and updates from each of our cohorts.
